eWorkplace Apps

eWorkplace Apps offers supplier/vendor rating, a key capability within its Quality Management Suite for Acumatica. It is designed to empower manufacturers and distributors to systematically evaluate suppliers using both quantitative and qualitative metrics. The tool helps measure vendor performance using pre-defined KPIs (Key Performance Indicators) or criteria that include quality, quantity, price competitiveness, and on-time delivery. Track and analyze vendor performance using scorecards and rankings, based on business priorities, to ensure smarter supplier management and smoother operations.

Supplier/Vendor Rating

Track and rate vendor performance to ensure reliability, quality, and efficiency.

Key Features Include:

- Assign a weightage percentage to evaluation parameters according to the organization's priority for a focused evaluation process.

- Define custom variance range and scores for each performance metric.

- Evaluate the supplier's performance for a specific stock item for targeted insights.

- Assess vendor performance annually, quarterly, weekly, or monthly based on business needs.

- Visualize vendor rating with comprehensive scorecards and ranks for each KPI.

- Analyze data using the vendor rating dashboard to identify top-performing vendors based on quality, quantity, price, and delivery accuracy.

- Generate a vendor performance report for a specific stock item and vendor to analyze the rank and score for each KPI or criterion.

Why Supplier/Vendor Rating?

- Regular vendor assessments help align the vendor's goals with the organization's goals, fostering enhanced vendor collaboration.

- Identify the underperforming vendors and renegotiate the terms to optimize costs and resources.

- Gain a performance visibility of each vendor for greater transparency and make informed decisions.

- Mitigate risks and supply chain disruption with early detection of risks and stay compliant.
